

The future has begun In Charge of E-Mobility

ALPIQ

Alpiq E-Mobility AG
Zürich, 30.11.2012

Alpiq is a leading, operationally independent European energy company with strong Swiss roots in Switzerland. We are active in the Energy and Energy Services Business.

A young man with dark hair, wearing a grey t-shirt, is shown in profile, focused on his work. He is in a server room, working on a network switch. The switch is a rack-mounted device with a green faceplate and several ports. A red Ethernet cable is plugged into one of the ports. The background is a blue server rack. The text is overlaid on a white rectangular box in the upper right portion of the image.

With 3,800 employees and 80 branches, Alpiq InTec offers a comprehensive range of services in the fields of building technology and facility management as well as transport technology and energy transmission.

Marco Piffaretti (member of the board) was manager of Europe's biggest EV demo project, the project called VEL1 in Mendrisio (1994-2001) with over 400 electrical vehicles.

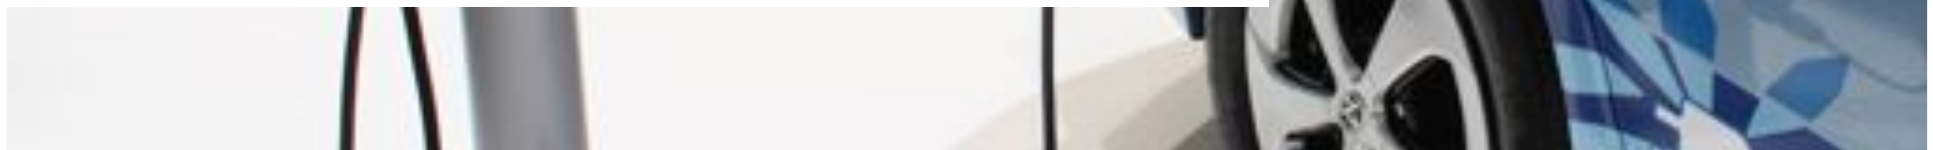

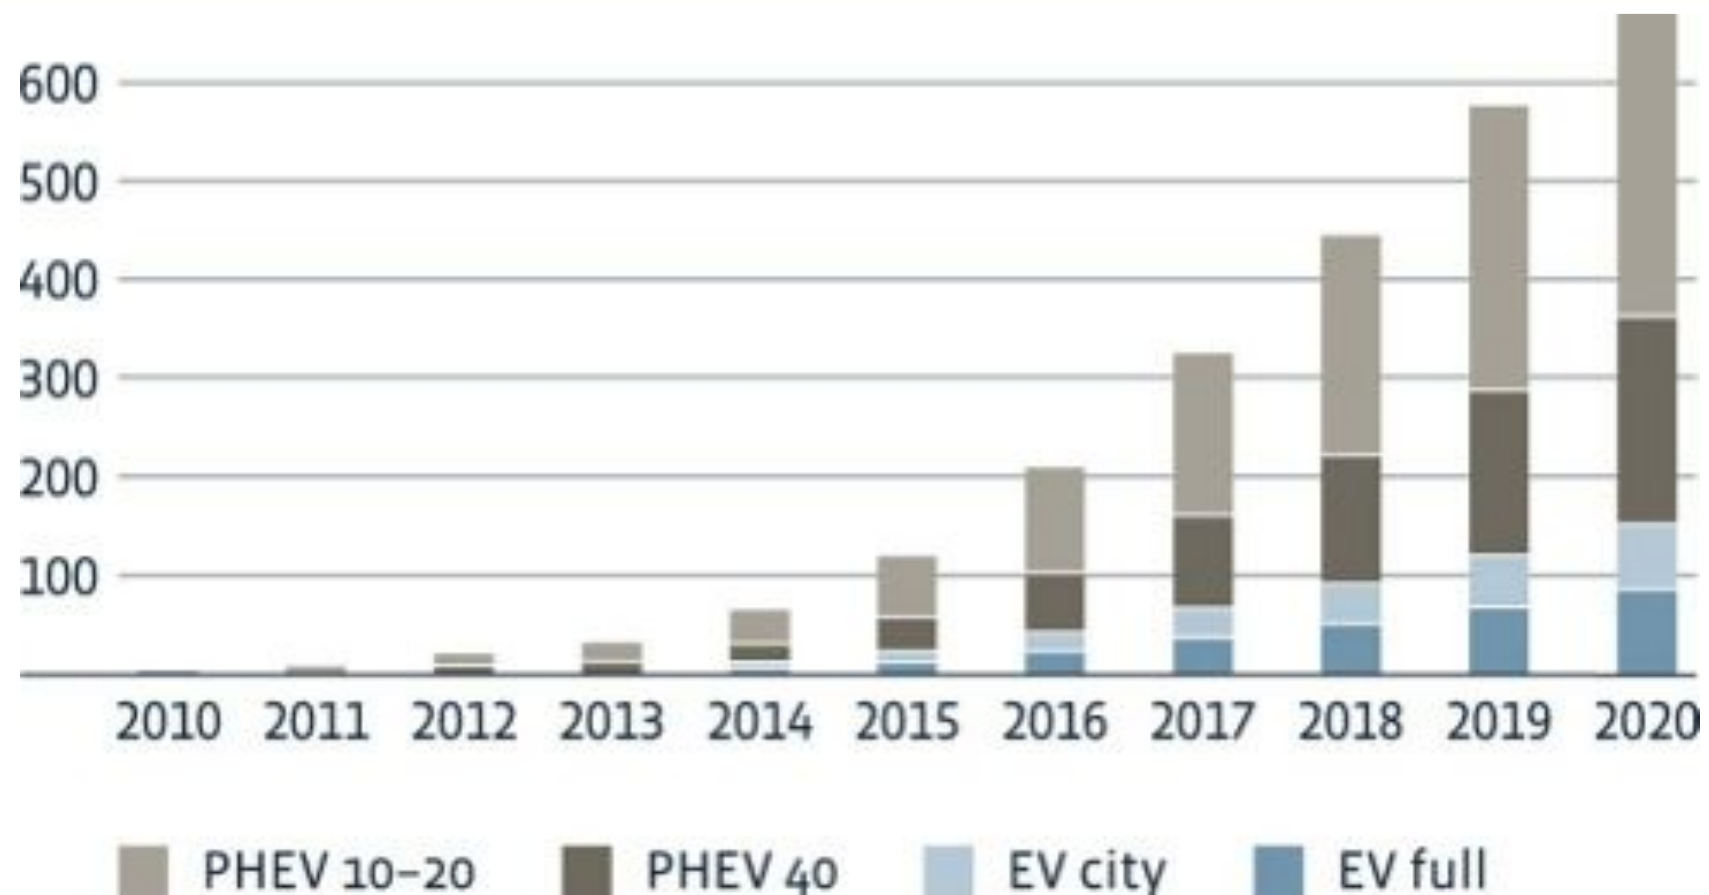

Alpiq is coo founding member of the first nationwide privately founded fast charging network for EV's in Switzerland. Plan is to reach 250 fast charging points.

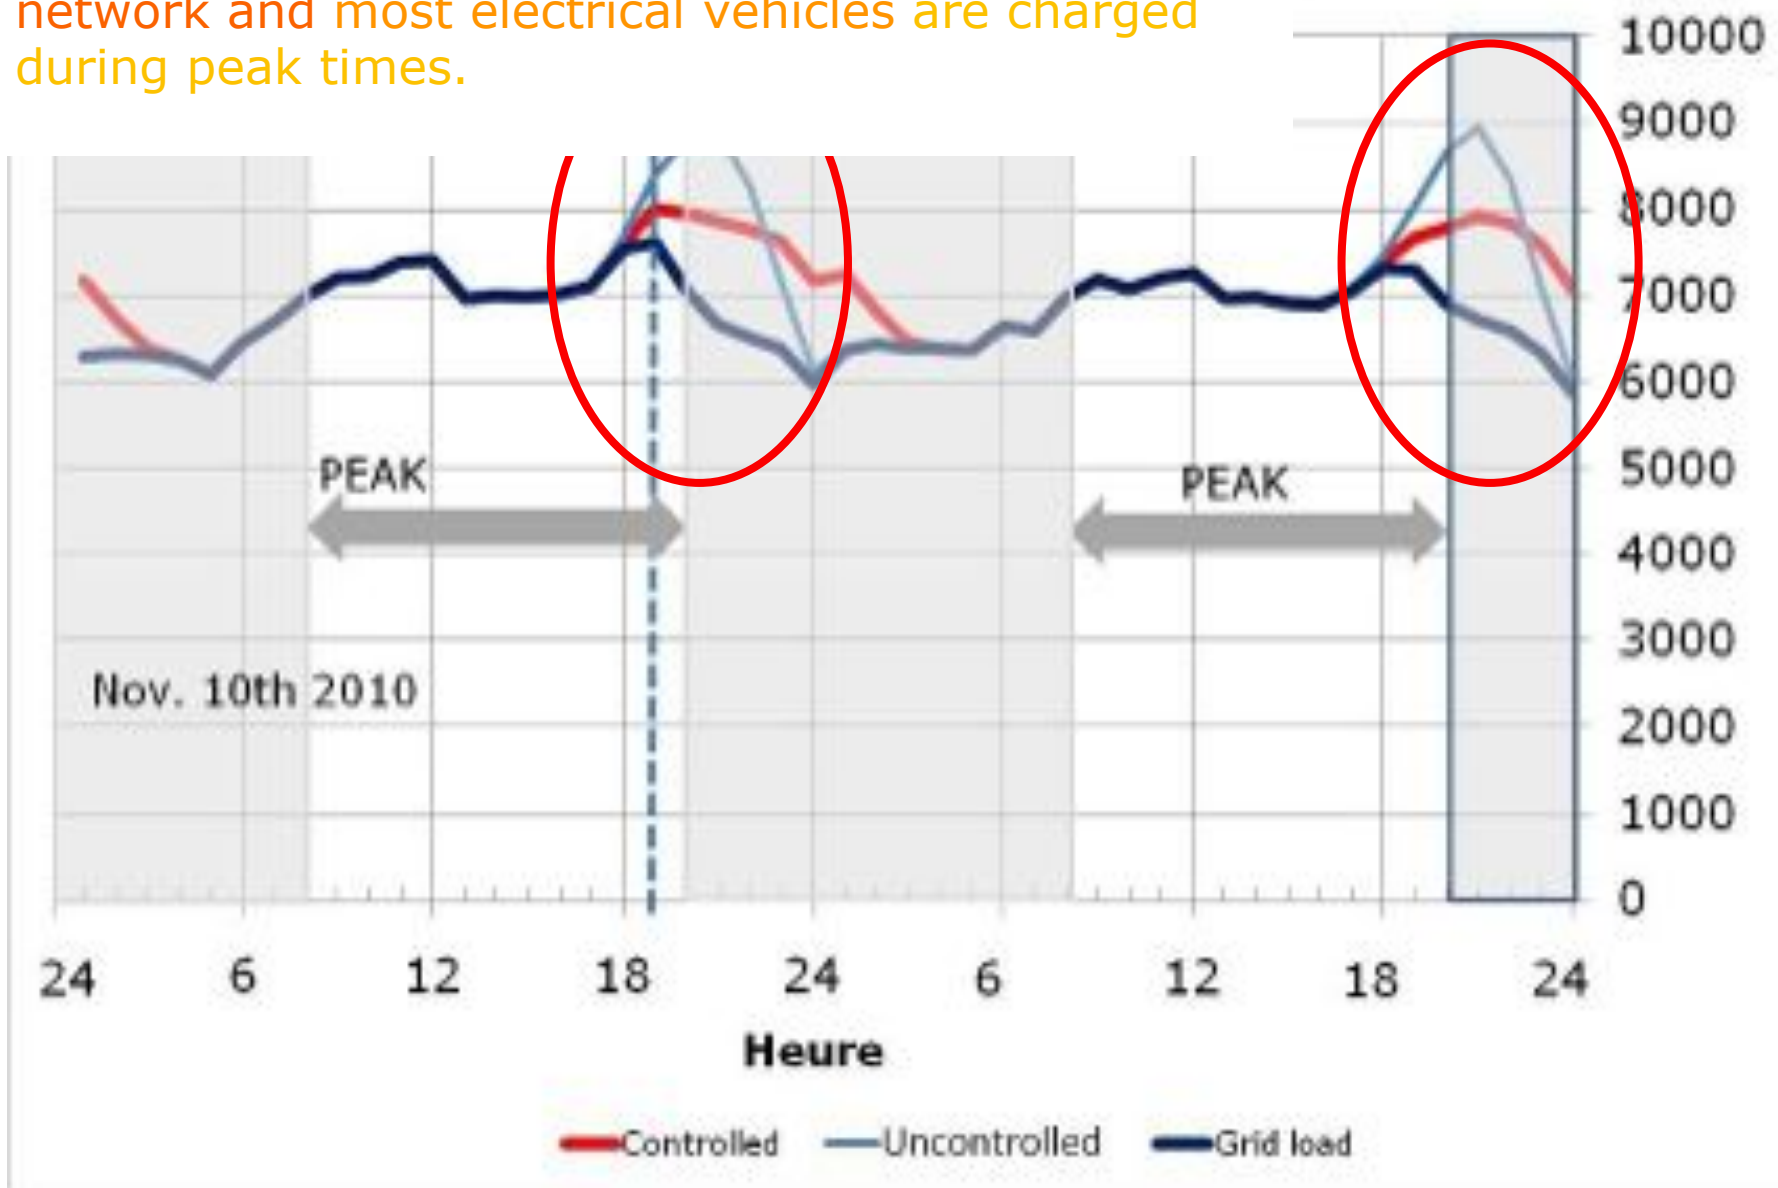

Every Toyota Prius Plug-in Hybrid in Switzerland is sold with a HomeChargeDevice of Alpiq and installed by a e-mobility specialist of Alpiq at customers home.

Only 1.8% to 2.5% higher loads on the grid in case of 720'000 electrical vehicles on the streets in Switzerland.

Electrical vehicles will not spread equally in the network and most electrical vehicles are charged during peak times.

We plan and install charging infrastructures for electrical vehicles. And are committed to responsible energy management. Intelligent Charging for electrical vehicles.

In Charge of E-Mobility. Thank you for listening.
